

TLVTech provides professional, customer-centric software development solutions for government organizations, large companies and startups worldwide.

## Who we are

Since 2018, TLVTech experts have successfully completed projects for startups and large organizations globally. Whether it's a biometric project aimed at enhancing airport border security for a government client, a financial institution seeking to improve fraud detection and compliance capabilities, or a startup that has recently secured seed investment or grant funding and requires the development of an MVP within a tight 30-day timeframe, our team excels at tailoring its approach to meet the unique needs of each client.

#4 - People choice Best Web Development 2022

#9 - Best Custom Software Development in Dec 2022

#16 in the list of Companies that achieved the highest revenue growth rate from 2021 to 2022 issued by Clutch

## What we do

### Backend Development

Our team of backend ninjas will build and maintain backend systems using the most up-to-date standards and architecture.

### Mobile Development

We specialize in creating end-to-end tailor-made mobile solutions using latest Hybrid and Native technologies and with a seamless native user interface design.

### Fractional CTO

Our expert CTOs provide invaluable guidance in tech strategy, team building, R&D management, deep-tech, and architectural decision-making. With 20+ years of R&D management experience, we craft winning tech strategies.

### Cloud-native development

Our cloud native approach allows us to provide you with scalable, flexible and cost-effective architecture and solutions.

### Software Architecture

Our approach to software architecture is guided by industry best practices, and we're well-versed in the utilization of cutting-edge technologies and methodologies.

### Frontend Development

To rapidly build scalable, complex frontend, we deploy our expert team of frontend developers.
